

# How To Install Marketing Website Generator

## Requirements:

1. Web hosting server
2. cPanel or Fantastico, a third party software to manage your server files and MySQL database.
3. Purchase the install Gold Pack from Intellispire website at: <http://www.intellispire.com/web>

## Procedure:

1. Upload MWG on your server.
2. Create MySQL database and DB username, using cPanel
3. Set-up MWG, email Forwarder, and cron jobs.
4. Configure setting of your MWG website.

## Step-by step

### 1. Install MWG on your server.

- Login to your cPanel (eg. [www.yourdomain.com/cpanel](http://www.yourdomain.com/cpanel) )
- Go to “File Manager” > select “Web Root” radio button > click Go
- Select folder “home” > click “public\_html” folder > create new folder (eg. mwg)
- Upload “mwg-ver-`nnn`.zip” to sub-directory (mwg) using cPanel upload icon.
- Extract “mwg-ver-`nnn`.zip” using cPanel upload icon (should be quick).
- Delete “mwg-ver-`nnn`.zip” after extraction. You no longer need it.
- Next, create MySQL database

### 2. Create MySQL database and DB username.

#### Using cPanel:

- Go to cPanel home, find and click “MySQL” icon
- Create name for database (e.g. `name_mwg120`) on box provided

- Next add new user on box provided (e.g. name \_mwgadm) , use password generator, save password on a notepad, then click “create user” button.
- Go to Add User Database, select both database and username on dropdown menu, click “add” button.
- Check “All Privileges” radio button, and click “make changes” button.

At this point, your database and web directory should be ready.

### 3. Set-up MWG, email Forwarder, and cron jobs.

#### Set-up MWG:

- Open a tab on your browser and indicate the path link to where you installed your mwg software. ((eg: [www.yourdomain/mwg/](http://www.yourdomain/mwg/)).
- Read the instruction indicated, and just click on “Next”.
- Enter your DB username (eg. name\_mwg120)
- Enter your DB password
- Enter your DB host, 99% of the time indicate “localhost”.
- Enter your DB name (eg. name\_mwgadm)
- Enter MWG backed admin password: (eg. Admin) Just change it later
- Click “next”, then enter your name and email, the click “continue”.
- On this page an instruction to delete the "install" folder in your server. Go ahead to your cPanel, file manager > directory where your MWG files reside (eg. /public\_html/mwg ), then **check "install" folder and delete that.**
- Click “admin” to log-in to your site.

#### Set-up email forwarder:

- Go to cPanel home, find and click “Forwarder” icon.
- Click “add forwarder”
- Address to forward usually indicate “info”, or any you prefer.
- Forward to email address, type in your email.

- Then click add forwarder.

#### Set-up cron jobs:

- Go to cPanel home, find and click “Cron Jobs” icon.
- Select the following code in the box provided:

#### Code:

---

```
0 0 * * * php /PATH/TO/SITE/admin/cron.oto.bck.php
*/5 * * * * php /PATH/TO/SITE/admin/cron_send.php
0 12 * * * php /PATH/TO/SITE/admin/cron_expand_followups.php
*/10 * * * * php /PATH/TO/SITE/admin/cron_expand.php
```

---

Note: You can always select “common settings” drop down menu, then make sure you have the right path for your cron files;

eg. [php /home/cPanelUsername/public\\_html/yourdomain.com/admin/<filename>](#)

#### 4. Configure setting of your MWG website.
